Dear Scott Downey,

I have been in touch with Karen Bishop who has sent me the entire plan of sampling/testing to read. I see there, that the Herbicides about which I was concerned have been planned for in the sampling/ testing document. The reason I included that list of herbicides (received from the state librarian) was that in all discussion on the meeting viewed on u-tube, no one discussed at all any substances but 2,4-D and atrazine.

Knowing that all those herbicides had some nasty affects to both the environment and the animals within it, I wanted the community to know that a more general approach was needed, especially in possible water contamination. So I am reassured that a complete assessment is planned. Thank you for your thoroughness in producing this plan.

This investigation hopefully will add to scanty info on human effects available now.

Warmly--Eleanor Ryan

Eleanor - thank you for the information. EPA will review the materials
for relevance to the exposure investigation.

Subject: Comment on assessment prodical in Triangle Lake Herbicide  
investigation

Dear Management Team for Triangle Lake Herbicide investigation

Please review the attached files to consider broading the prodical to  
include: other sampling sources and other herbicides beyond 2,4-D.  
Thank you for your consideration of this material  
Sincerely, Eleanor Ryan
